

# Software Engineer

---

Commerce-Connections was formed as an independent B2B/EDI service provider in 1999 to address the increasing demand for B2B software and services. Our main office is in Woking, just outside London. In 2007 we have expanded into Hong Kong with a fully-owned subsidiary.

This is a technical role for a self-motivated, dynamic developer who will be involved in all aspects of software and service development.

The successful candidate will be responsible for on-going development and technical support of our EDI/B2B/EAI management software solutions.

Another aspect of the position is the day-to-day support of our clients.

## Desired Skills & Experience

Successful candidates will be expected to have extensive experience of software development including the following:

## Knowledge

- Client/server development philosophies
- Project management
- Development environments
- Database environments
- Source control procedures

## Skills

Should have a minimum of 2 years' technical experience in any of the following:

- Microsoft Visual Studio .NET IDE, C#.NET, VB.NET and SQL Server
- Java development
- Web development

Apart from that the candidate must possess excellent English skills to be able to communicate with our customers effectively.

## An understanding of any of the following technologies/tools would also be advantageous

- FTP/FTPS/SSL Certificates
- ERP products
- XML, JSON
- Drupal
- Internet protocols
- Microsoft SQL Server, SQLite, MySQL
- Eclipse
